## **Mouse IL17A Protein**

Cat #: PRP1300

Size: 5 µg/20 µg/100 µg /1 mg

## **Product Information**

|     | Product Name: Mouse IL17A Protein                        |     |                                    |
|-----|--|-----|------------------------------------|
| REF | Catalog Number: PRP1300                                  | LOT | Lot Number: Refer to product label |
|     | Purity: > 98 % as determined by SDS-PAGE                 |     |                                    |
| Ŷ   | Storage: Store at -20°C                                  |     | Preparation method: E.coli         |
|     | Shipping: The product is shipped at ambient temperature. |     |                                    |

**Background:** Interleukin-17 (IL-17) is a potent pro-inflammatory cytokine produced by activated memory T cells. There are at least six members of the IL-17 family in humans and in mice. Mature mouse IL-17A shares 61% and 89% amino acid sequence identity with human and rat IL-17A, respectively. As IL-17 shares properties with IL-1 and TNF-alpha, it may induce joint inflammation and bone and cartilage destruction. This cytokine is found in synovial fluids of patients with rheumatoid arthritis, and produced by rheumatoid arthritis synovium. It increases IL-6 production, induces collagen degradation and decreases collagen synthesis by synovium and cartilage and proteoglycan synthesis in cartilage. IL-17 is also able to increase bone destruction and reduce its formation. Blocking of interleukin-17 with specific inhibitors provides a protective inhibition of cartilage and bone degradation.

Sequence: Amino acid sequence derived from Mouse IL17A (Thr22-Ala158) (Q62386) was expressed.

**Protein length:** The recombinant Mouse IL17A Protein consists of 137 amino acids and predicts a molecular mass of 15.4 kDa.

Biological Activity: Testing in Progress.

**<u>Endotoxin</u>**: <0.1 EU per  $\mu$ g of the protein by the LAL method.

Formulation: Lyophilized from 20 mM Tris-HCl, 50 mM NaCl, pH 8.0.

**Storage Instructions:** Lyophilized protein product should be stored desiccated below -20°C. Upon reconstitution, the protein should be stored at 4°C between 2-7 days and for future use below -20°C. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Please prevent freeze-thaw cycles.

<u>Usage notes</u>: Always centrifuge tubes before opening. It is recommended to reconstitute the lyophilized protein using the buffer we provided not less than 100 µg/ml, which can then be further diluted to other aqueous solutions.
